Chapman Bespoke
Boot Chests

A Chapman Boot Chest

My unique boot chests are completely hand made using the highest quality materials.

What safer or more stylish way to transport your gun(s), shooting accessories, drinks and entertainment than a fully functional, lockable bespoke boot chest.

Solid in construction the traditional English design has charm and elegance.

The Choice of Wood is Yours

The preferred choice of wood is Walnut closely followed by Oak and Maple (a very light coloured wood). Walnut is most popular due to its rich depth of colour and great looking tight grain. It is also possible to match the finish of your gun stock to the finish of the boot chest.

Height & Drawer Combinations

You may require just one half of your boot to be used as chest space (left or right) or maybe only half the height giving you two drawers side-by-side. Alternatively you may wish to have just one large drawer. You can also opt for the full size boot chest with drawer, top and bottom, spanning the width of your boot space. It is entirely your choice.

Average Dimensions:

- Double Height Chest
  1100mm (W) x 700mm (D) x 480mm (H)
- Single Height Chest
  1100mm (W) x 700mm (D) x 200mm (H)
- Half Width Chest (one side of boot)
  500mm (W) x 900mm (D) x 550mm (H)

Customised Interior

The gun drawer is fairly simple in layout giving you ease of access to your gun, cleaning kit and other accessories.

The other drawer is normally used as a drinks and entertainment unit, with space for your favourite tipple, peg cups, Champagne flutes and cheese board.

You can specify your exact layout, perhaps to cater for a specific item you wish to be included in the drawer, or if you prefer why not opt for a unique Chapman Bespoke layout at no additional cost.

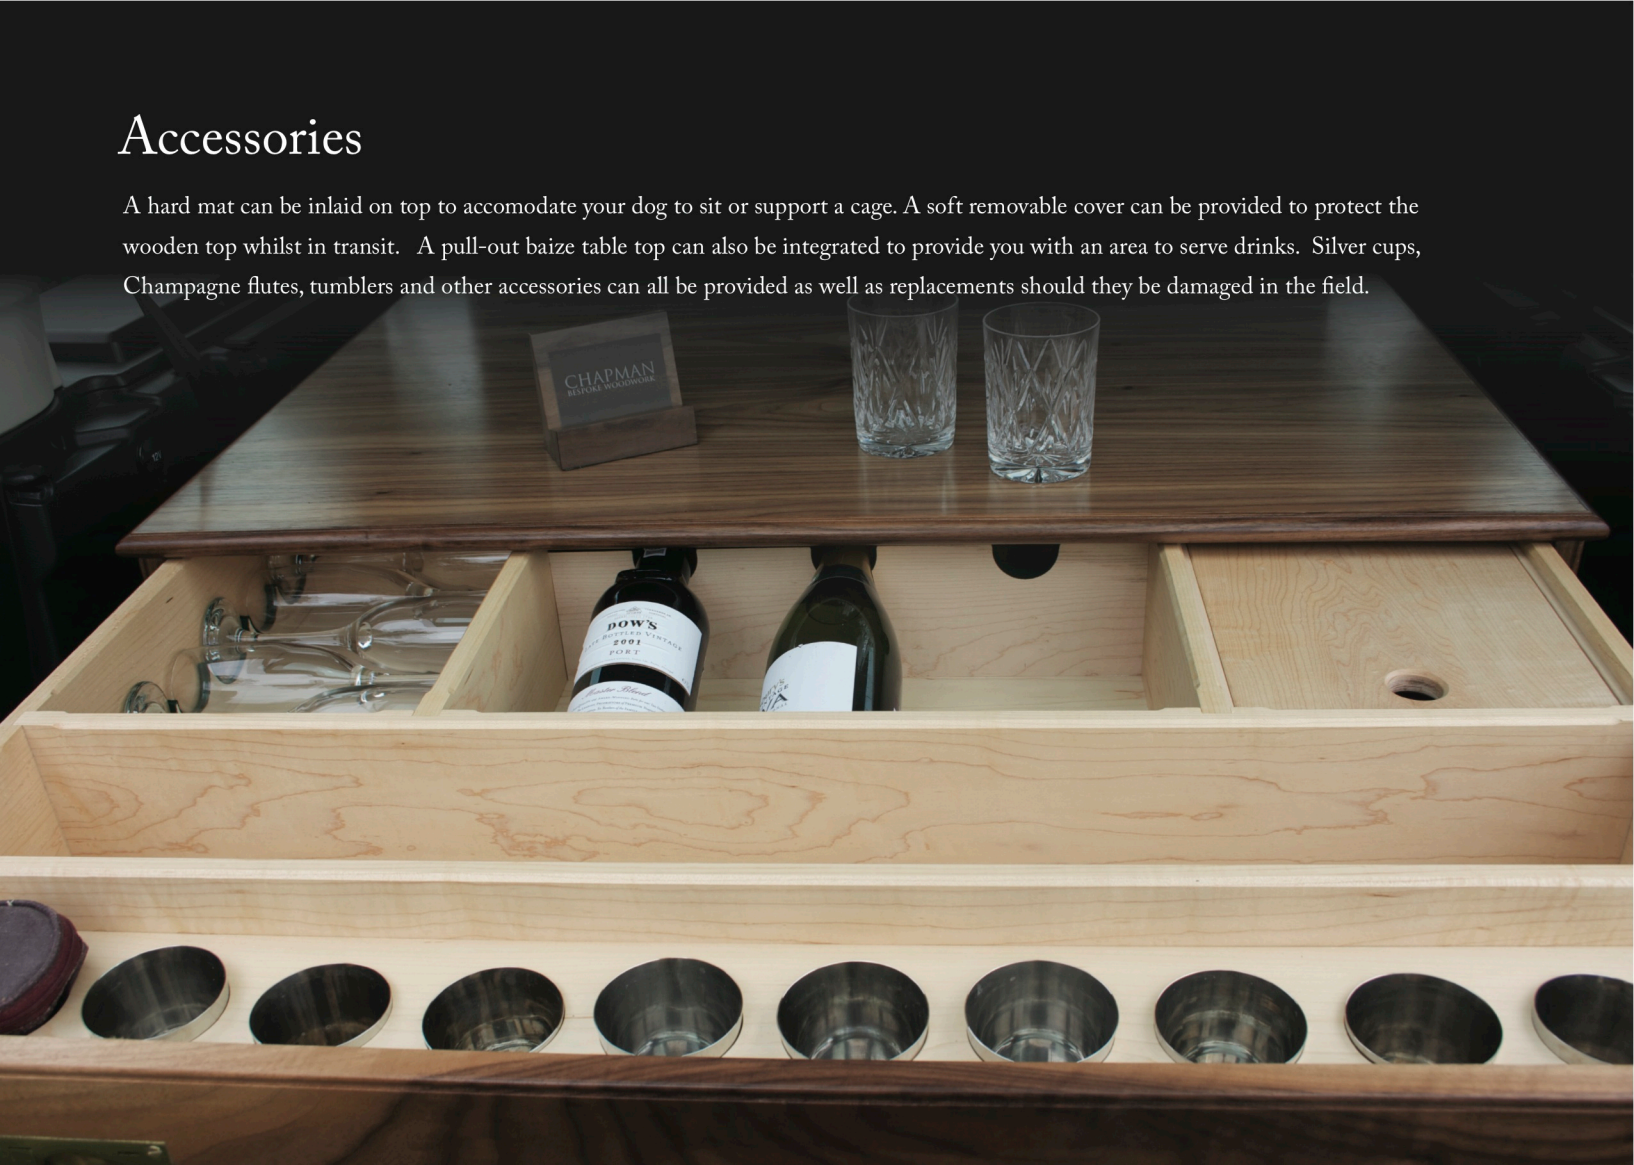

"The attention to detail and finishing touches are what make Chapman Boot Chests charming and unique."

Accessories

A hard mat can be inlaid on top to accomodate your dog to sit or support a cage. A soft removable cover can be provided to protect the wooden top whilst in transit. A pull-out baize table top can also be integrated to provide you with an area to serve drinks. Silver cups, Champagne flutes, tumblers and other accessories can all be provided as well as replacements should they be damaged in the field.

Aftercare & Final Word

I finish the boot chests in the traditional method of Danish Oiling using between six to eight coats and a final finish of hard bees wax to really give the chest a rich depth and soft feel. I offer an after-care service for the end of the shooting season to have the chest back in the workshop to buff out any knocks or scratches if the chest needs it.

"I have designed and crafted boot chests for many discerning customers, some of whom organise their own shoots. These chests have become both a focal point and a must have accessory. They make the perfect, unique gift for that special person and will gain in value when passed down through the generations."
